

## EXPERIMENT 4

### REST API Design with MongoDB + Mongoose Integration

#### CODE:

```
JS awarenessRoutes.js X JS db.js JS Footprint.js JS Waterlog.js JS Recyclable.js JS Donation.js JS .
routes > JS awarenessRoutes.js > ...
1  const express = require('express');
2  const router = express.Router();
3
4  // Sample sustainability awareness tips
5  const tips = [
6    { id: 1, tip: "Switch to reusable bottles instead of single-use plastic." },
7    { id: 2, tip: "Turn off lights and appliances when not in use to save energy." },
8    { id: 3, tip: "Donate old clothes instead of throwing them away." },
9    { id: 4, tip: "Walk or cycle for short distances instead of using vehicles." },
10 ];
11
12 // GET all tips
13 router.get('/', (req, res) => {
14   res.json(tips);
15 });
16
17 // GET one tip by ID
18 router.get('/:id', (req, res) => {
19   const tip = tips.find(t => t.id === parseInt(req.params.id));
20   if (!tip) {
21     return res.status(404).json({ message: "Tip not found" });
22   }
23   res.json(tip);
24 });
25
26 module.exports = router;
27
```

```
footprintController.js JS footprintRoutes.js JS recyclablesController.js JS recyclablesRoutes.js
routes > JS donationsRoutes.js > ...
1  const express = require('express');
2  const router = express.Router();
3  const Donation = require('../models/donationModel');
4
5  // POST a new donation
6  router.post('/', async (req, res, next) => {
7    try {
8      const { item, quantity, donorName } = req.body;
9
10     const donation = new Donation({ item, quantity, donorName });
11     const savedDonation = await donation.save(); // saves to MongoDB
12
13     res.status(201).json({
14       message: 'Donation saved successfully!',
15       donation: savedDonation
16     });
17   } catch (error) {
18     next(error);
19   }
20 });
21
22 module.exports = router;
```

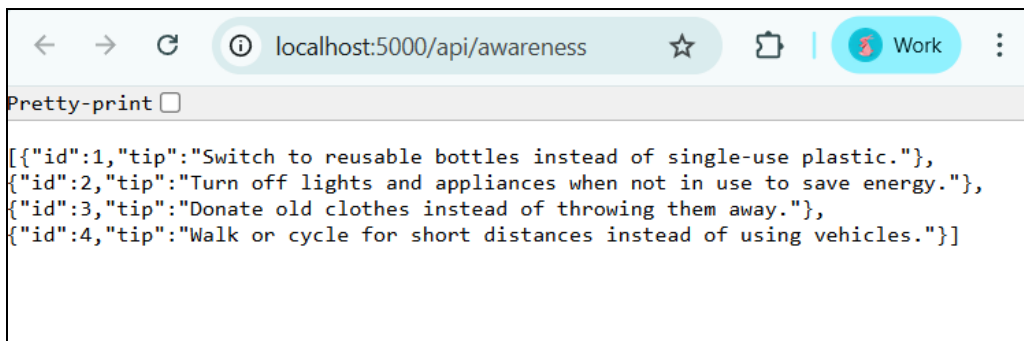

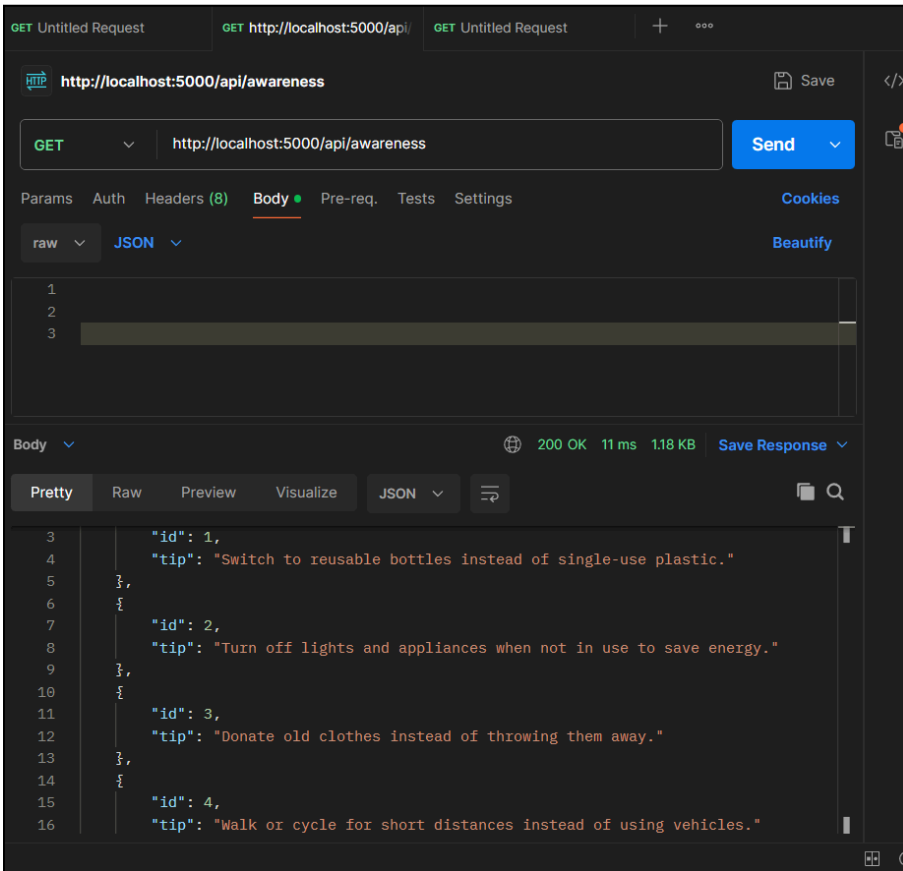

```
footprintController.js  JS footprintRoutes.js X  JS recyclablesController.js  JS recyclablesRoutes.js  JS seed.js  JS donationsRoutes.js

routes > JS footprintRoutes.js > ...
5
6 router.post('/',
7   body('transportMode').isString().notEmpty(),
8   body('distanceKm').isNumeric().optional({ nullable: true }),
9   async (req, res, next) => {
10     const errors = validationResult(req);
11     if (!errors.isEmpty()) return res.status(400).json({ errors: errors.array() });
12     next();
13   },
14   createFootprint
15 );
16
17 router.get('/', getFootprints);
18 router.get('/summary', getSummary);
19
20 module.exports = router;
21
```

```
footprintController.js  JS footprintRoutes.js  JS recyclablesController.js  JS recyclablesRoutes.js X  JS seed.js  JS donationsRoutes.js

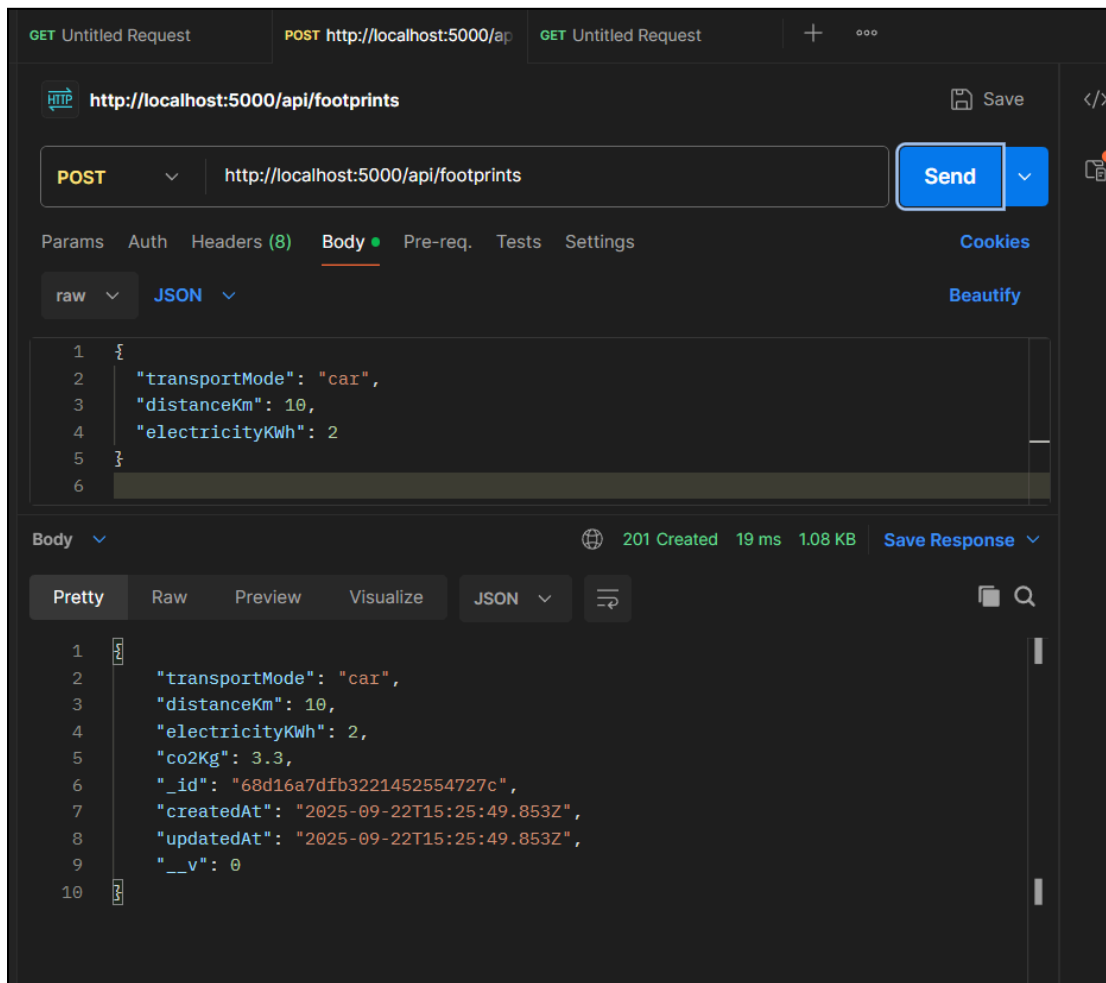

routes > JS recyclablesRoutes.js > ...
1 const express = require('express');
2 const { createRecyclable, getRecyclables, updateRecyclable, deleteRecyclable } = require('../controllers/recyclablesController');
3 const router = express.Router();
4
5 router.post('/', createRecyclable);
